SIR,-During the past five or six days we have had a succession of fires which have in which the fire breaks out, and the apcrowds which incommode the operations of the firemen. Coolies staggering under huge bundles of household stuff cross the streets in all directions, generally managing with the strong common sense so observable in the native race, to go in any direction but the easiest and safest one. People crowd amongst the engines and hose, and not seldom, Europeans who are not members of the brigades come down in their sedan chairs to gaze at the destructive element. The Sikh policemen struggle manfully to keep all in check and order, but their efforts at present seem little better than useless. either for this purpose or for preventing -looting. It is believed that at the Peel Street fire large quantities of goods were looted and have not since been seen. Then again the members of the fire brigades, in spite of the exertions of their officers, seem animated by an intensedesire to be strikingly to me that there are some simple and easy means of bettering this state of affairs, which, if adopted, would lead to much greater efficiency in the work of the brigades. The By means of such a cordon the firemen's freedom of action would not be hampered by crowds-and not only much necessary violence at present used by the Sikhs would be avoided, but it would do away with the cutting of the hose; an act which ought to be criminal if it is not, as it is as bad, if not worse than arson. I understand this cowardly act made its appearance again at the Peel Street fire the other day, and that the two Chinese guilty of this edious deed

THE KELLY AND WALSH FIRE CASE. Pung Chuck Nam, Wong San Shan, an Long Ahi were again brought up on the charge of having unlawful possession of a pawn ticket relating to stolen property. The property is a watch which has been proved to have been in a safe in Messrs Kelly and Walsh's at the time the fire took place in their premises in July last, Evidence had been led before as to the defendants' connection with the matter and further evidence was taken against them

Mr Wotton represented the first defendant and Mr Mossop the third, the second was unrepresented.

An Young Chui, said said he had known the first defendant for five or six years an during that time he had known him bear good character. About the end of November the defendant had come to witness and asked him to become security to a pawnbroker with whom defendant wished t pown a watch which a friend had told him to pawn. He had no suspicions of defendant, and had no hesitation in becoming security for him. He acknowledged giving the security paper produced.

Evidence was given by the assistant i the Kwan Tai Pawnshop, where the watel was pawned, as to the pawning of the watch. This witness heard defendant say to the accountant in the pawnshop that he had bought the watch.

The accountant said that on the 17th De comber the first defendant came and offered the watch for \$70. The witness asked who the watch belonged to, and the defendant said it belonged to a friend. He refused to accept it until the security had been got; this defendant procured in the manner described by the first witness. He paid him -\$65 for the watch. He had never seen the day. defendant in his shop before. He did not ask how his friend had come by the watch. He did not imagine that the watch had been stolen; because the defendant asked so large a price. There were not many watches like the one in question pawned. | The first defendant was alone when he came to the pawnshop and acted in a straight-

forward manner. did not think it strange that defendant's friend did not pawn the watch himself The reason he requested a security was that defendant wanted a high price, and also because he was not acquainted with him. He only required security when valuable property was presented by unknown people. It did not strike him as strange that a Chinaman should have a watch of this de-

scription. Inspector Perry said this article was such as might be received by a pawnbroker on obtaining security from a respectable man. He did not think that there would be anything suspicious about a pawnbroker receiving a watch from a person who said he had

This was all the evidence against the defendants. - Mr Wotton who appeared for the first defendant, said he did not purpose to call any witnesses, and if he did it would only be as to character. He thought that there was no necessity for this, and he submitted that there was really no case against first defendant; as his behaviour from the time he got the watch had been of the most straightforward and open-description. The evidence had not brought out that he was possessed of guilty knowledge. He had asked from the pawnbroker a price which nearly approached to the value of the watch, and anyone who was possessed of guilty knowledge, would not have disputed with the pawnbroker about the price, but would have gone to some other place and accepted a smaller sum. He had given his correct name and address to the pawnbroker and his whole behaviour had had nothing suspicious in it, and his actions had been those of a party | swift steel torpedo launches have been sent

Captain Clegg and the members of his crew, who had stayed on the steamer, did all they could devise to rave the vessel; and, to attract the attention of the crew of any vessel in the neighbourhood, rockets and blue lights were brought into requisition. Fortunately the Customs' phires, and other valuable stones and Revenue Cruiser Kwa-shing, Captain N. P. Anderson, was anchored about three-quarters' of a mile away, and the two boats that had left the Foothow were carried in her direction. The one containing the chief and second engineers missed the Kwa-shing, but the life-boat was more fortunate. The fifteen Chinese it contained were taken on board by Captain Andersen and his officers, but the life-boat itself, having had a hole knocked into it, was swamped and lost. Learning from the Chinese of the precarious condition of the Foothow, Captain Andersen immediate y got up steam and proceeded towards her, but owing to the roughness of the sea, which resembled, to use the language of an eye witness, a huge surface of boiling water, she was unable to get close to her, and had to anchor at a distance of about two cables. Upon the direction of Captain Andersen, Mr. Chenoweth, the chief officer of the Kwa-shing, manned the life-boat with a crew of Chinese, and in three trips transferred every person from the Foochow to the Kwa-shing, where they were supplied with dry clothes and refreshments, and in other ways they were well cared for. (N. C. D. News.) Imperial favour for the Department Magistrate of Knang Chou., whose timely information of the existence of the band made it possible to despatch a force to cope with them before they had united their forces or matured their force or matured their plans; and for Chiang Kuei-t'i, Brevet Commander in-Chief, and other officers, who contributed to the success of the late operations. The marks of distinction applied for are sauc

tioned by rescript, and Li Ho-nien, the new Governor of Honan, is directed to continue the search until the rebel chief still at large is captured. (1) A Decree, directing She Picishsian, Prefect of Canton, to vacate his post, the duties of which are too onerous for him in his present enfuebled state of health. appointment is to be filled by an officer, selected from among the prefects at present holding substantive office in Kuangtung. (2) Memorial from Ch'ung-chi, Military Lieut.-Governor of Jeholo. Memorialist was some time since directed, in common. with all the Governors-General, Governors, and Military Governors throughout the Empire to submit to the throne his ominion on a contemplated abolition of the law which gives authority to the Provincial governments to execute criminals of a certain class at the scene of their offence, without the necessity of sending them forwar to the Provincial capital or praviously obtaining the Imperial sanction. Memorialist is strongly opposed to such a step both on general grounds, and particularl as applied to the region over which he is Governor. He considers that a powerful deterrent to the commission of crime would be lost, were a long interval of time allowed to elapse between the offence and its punishment: crimes of violence would shew a tendency to multiply, and such a state of things would be opposed to the grand aim of good government, which is to give peace. to the poople. Now the region administer. od by the Government of Jehole is wild and vast, being conterminous on one side with the Mongolian dependencies. It is inhabited by a nomad population, many whom have little respect for law; it is insufficiently garrisoned, and it is a favourite refuge for outlaws and bad characters from l the Southern provinces. Two quarters in particular continually suffer from the depredations of mounted banditti, namely the district of China which lies on the borders of Manchuria, and the sub-department of Dolomor. Though many members of these bands are from time to time taken and executed, a very considerable proportion manages to escape and bid defiance to the authorities. In the summer of the present year, Sun Chen-pang and others effected an entrance into the linnerthe occupation of horse-stealing, and then foreign guns, leaving little room for doubt as to the purpose to which they intended to apply them. Some volunteer forces, it is true, were called out, who succeeded escaped, but some particulars concerning him were ascertained from the prisoners twenty followers; he was however quickly by several other brigand chiefs. exists, in the neighbourhood in question, a arson, violent robbery, and forcible abduction of married and unmarried women. These facts, taken in connection with what has preceded, illustrate the ease with which a man in those parts may become a bandit : he betakes himself to vicious courses, not under the pressure of cold or hunger, or because I he has been made the dupe of others, but from choice. Retribution following quick upon the offence has hitherto failed to discourage these marauders, who would be inspired by much greater confidence had they nothing further to apprehend when captured than a punishment that might be indefinitely postponed. Some of their haunts, too, are far distant from Jehole; and chances of escape might present themselves on the road thither, or in the prisons in which they would be femporarily confined. The Governor concludes by stating that, as the outlaws to whom he has referred are all desperate characters to whom death suggests no terrors, any modification of the law on the side of leniency would not only be ill-advised, but would offer an extrainducement to others to follow in their path. He then proceeds to show from the sacred books that severity, is by no means. inconsistent with the character of a virtuous ruler, and that an Emperor, to be able to love some of his subjects, must possess the faculty of being able to hate others.-Res-

GOETHE'S WANT OF HEART. In reading Grimm's Life and Times of Goethe' we have wondered anew at that defect of the great man's nature which renders him, to us, an almost incomprehensible, half-human being-we mean the absolute coldness of heart which seems to have served to advance his giant intellectual growth, while it kept him morally dwarfed. It is hard to conceive of a man born without a heart, but on close inspection one is forced to look on Goethe as a being as really

HEALTH, STRENGTH AND ENERGY.

DR. LALOR'S PHOSPHODYNE

Discovered and so maniel, M.D. 1862, by R. D. Lalor, M.D.
TO RESIDENTS IN INDIA, CHINA, AND THE COLONIES, IT WILL PROVE INVALUABLE AS A RELIABLE LIVER TONIC AND A VITALISING RESTORATIVES

DR. LALOR'S PHOSPHODYNE

Is a Pure Solution of Phosphorus, pleasant in Havour and appearance, being a perfectly Bright Liquor, combined with Vegetable Atkaloids, possessing marvellous Curative Properties, the Wonder of Modern Chemistry, free from all, Dangerously Active Drugs ; innocent in its action, and pronounced by the Highest Medical Authority to be unequalled for its power in replanishing and elaborating the Vitality of the Body by its supplying all the essential constituents of the Blood, Brain, and Nerve Substance : and for developing all the Powers and Fanistions of the System to the highest degree thereby checking all Wasting of the Vital Finid, and the more Exhausting Wear and Tear of Life resulting from Over-taxed Energies of Body or Mind, maintaining that Buoyant Energy of the Brain, Nervous, and Muscular Systems; which-renders the Mind Cheerful, Happy, Bulliant, and Energetic.

DR LALOR'S PHOSPHODYNE

Surpasses all the known therapeutic agents of the present age, as The Only Safe, Reliable and Permanent Cure For all Derangements of the Nervous and Blood Nervous Prostration, General Debility, Mental and Physical Depression, Incapacity

for Study or Business, Noises in the Head, and Ears, Loss of Energy and Appetite, Nervous Debility in all its Stages, Softening of the Brain, Sleeplessness Paralysis, Pains in the Back, Affections of the Kidneys, Urinary Deposits, &c., Asthma, Scrofula, and Skin Diseases, Wasting or Withering of the Muscles, Impure and Impoverished Blood; Premature Decay of Vital Power and all morbid conditions of the system dependent upon the deficiency of the Vital Forces arising from whatever cause.

> THE ACTION OF DR. LALOR'S PHOSPHODYNE

Is Two-fold and Specific; on the one-hand increasing the principle which Constitutes Nervous Energy; and, on the other, the Most Powerful Blood and Flesh generating Agent known; therefore a Marvellous Medicine for Rehovating Impaire and Broken-down or Exhausted Constitutions, making the recipient as vigorous as is nature had never been retarded or debilitated.

A LARMING FACT.

Tens of Thousands of the people of China are to-day dying from the effects of Brain Disease, Dyspepsia or Disordered Liver, which say the springs of life. The results of these diseases upon the masses of intelligent and valuable people is most alarming. making Life netually a burden instead of enjoyment and ascialness, as it ought to be. There is not any good reason for this, seeing the united testimony of a great number of sufferers establish that DR. IALOR'S PHOSPHODYNE is superior to any Medicine yet discovered for the Care of Dyspepsia and Liver Complaints in all their varied forms. The promptness, and certainty of its action is such that when the fire of life seems to be dying out in the system, and the mind synn athising with the body, is reduced almost to a state of imbecility, this mighty PHOSPHORIC Restorative, by a few doses, seems as it were to lift the sufferer out of the slough of despond, and recruit and reinvigorate both the frame and the intellect.

TWENTY YEARS' PUBLIC TEST Prove these facts unimpeachable, being fully borne out by thousands of testimonials from every nation and country in the world, treely offered by distinguished families. private persons, military, naval, scientific, and pronessional num who are well known, and who have experienced from its use all the benefits here indicated. DR. LAEOR'S PHOSPHODYNE is sold in flottles at 4s. Gd. and Ha., by all Export.

Wholesale and Retail Medicine Vantors throughout the World. The large and continually Increasing Sale of Dr. Lalor's Phosphodyne, ance its introduction in 1872, has led some anscruphlous persons to foist Bad Imitations on the Public Abroad. Read the following Pailtie to-
